

# 2019 Fall - CFD LAB 1

	Number of Students
Total	14
Submitted	12
Not Submitted	2
Average	96.83
Standard deviation	1.52

### Comments

- Several students used wrong empirical equation to get the fully developed length, so they can't compare the CFD result correctly for both laminar and turbulent conditions.
- Some of students were missing some figure/tables.
- Some of student made mistake when they calculate the Error.
