

2021 Fall - CFD LAB 2

	Number of Students
Total	10
Submitted	9
Not Submitted	1
Average	96.44
Standard deviation	4.19

Comments

- Most student conducted simulation well and gave the correct answer for each questions
- A few of students missed V&V figures that should be reported
- One student could not calculate the lift and drag coefficient correctly and derived the wrong error
- Some of students could not answer for the question of section 9.2 correctly and gave the wrong answer for the validated location of the NACA foil
