

2021 Fall - CFD LAB 3

	Number of Students
Total	9
Submitted	9
Not Submitted	0
Average	97.78
Standard deviation	1.75

Comments

- Many students conducted simulation well enough compare to the previous CFD LAB, and posted figures and data appropriately
- A few students could not answer the location of both flow separation and reattachment correctly, and one student missed the answer for the flow separation at top boundary
- Some of students didn't post all required figure including axial velocity contour and streamlines figure
- Two students calculated wrong value of friction force for both 4deg and 10deg cases
