

# 2021 Fall - CFD LAB 4

	Number of Students
Total	9
Submitted	9
Not Submitted	0
Average	90.56
Standard deviation	8.93

### **Comments**

- Two students could not prepare the required figures properly and the discussion about the simulation results is not enough
- Several students could not have the frequency of drag force correctly, so they calculate wrong Strouhal number
- Some of students put the wrong answer for the drag force of each component of Ahmed body
- Also, a few of students extracted inappropriate force value from the experiment figure to compare with simulation results
