Quiz 2 Report

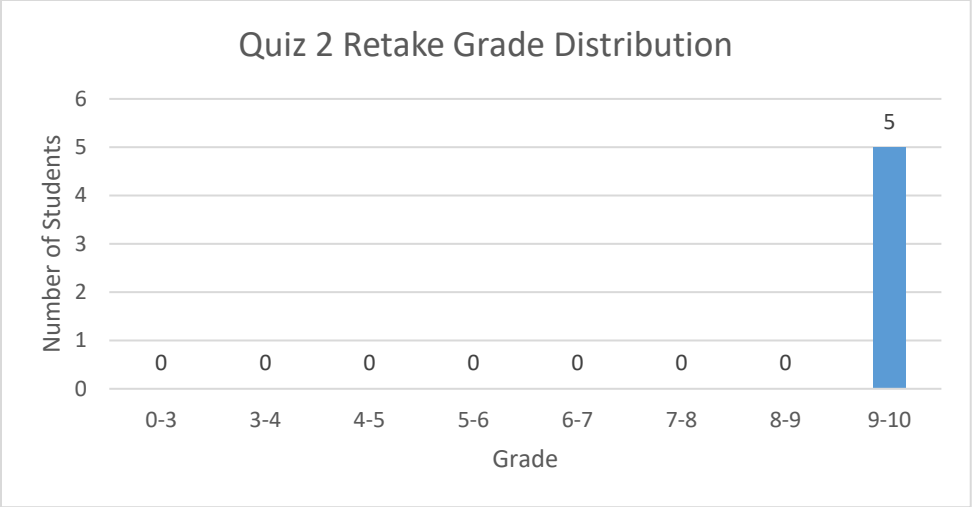

9/18/2026

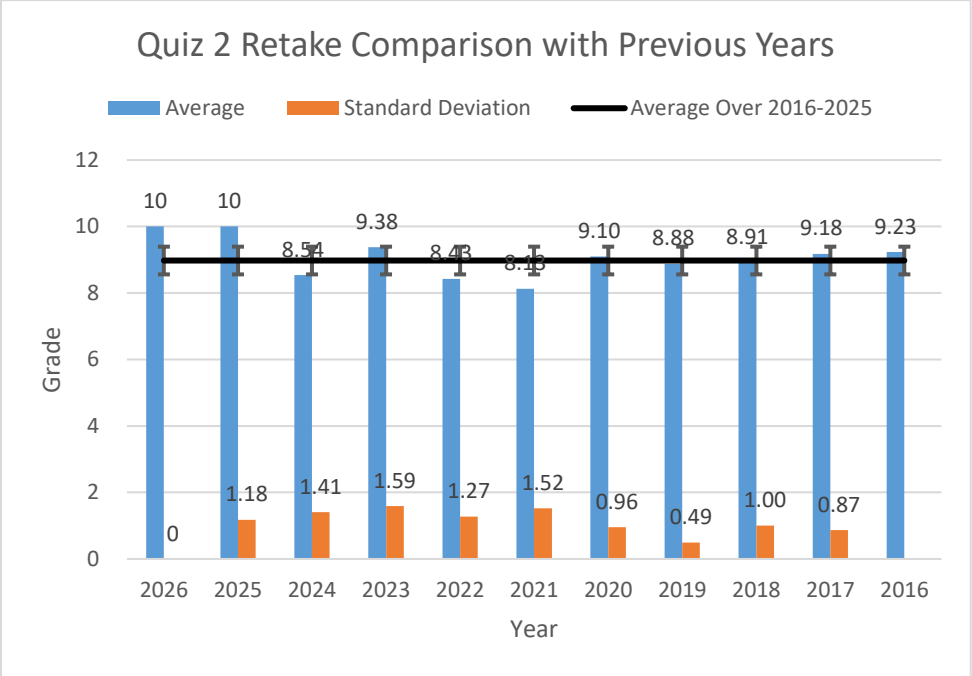

1. Summary

Total number of students	5
Attended	5
Missed	0
Average grade	6.80
Standard deviation of grades	1.48

2. Comments

- Most students did not set up the manometer equation correctly and were unable to determine the pressure difference between points 1 and 2. As a result, they could not correctly derive the relationship between pressure and velocity using Bernoulli's equation.
- All students completed the retake and performed well with guidance and assistance from the TA.
