Quiz 3 Report

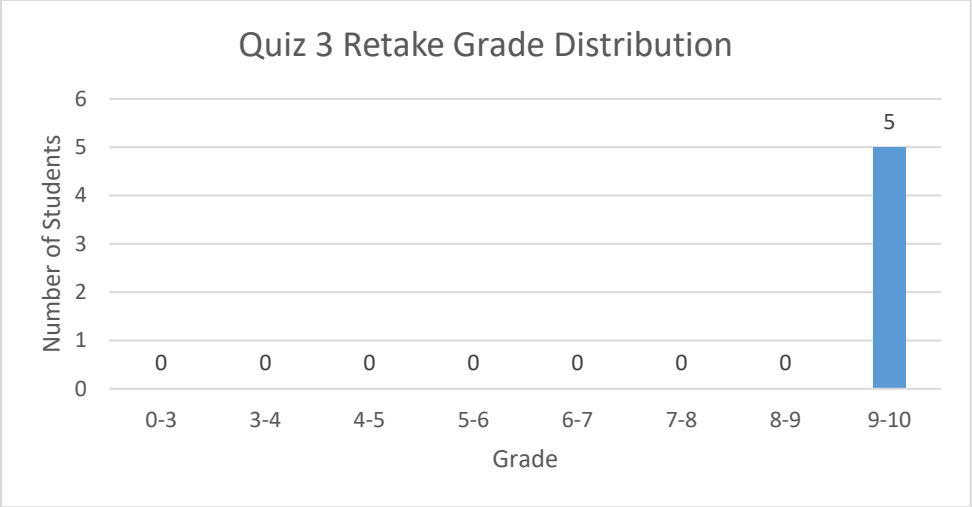

9/25/2026

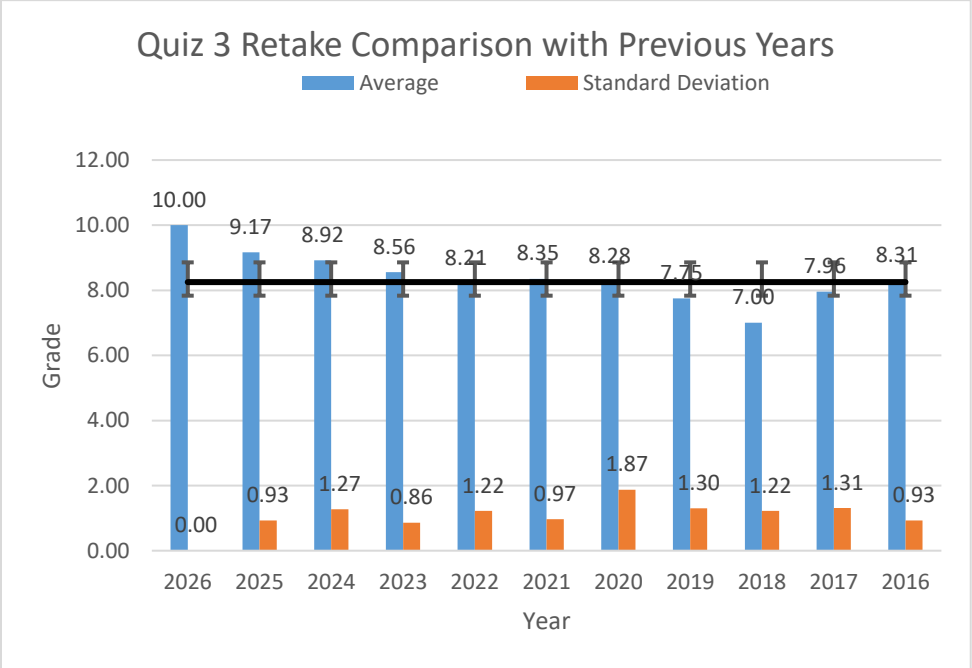

1. Summary

Total number of students	5
Attended	5
Missed	0
Average grade	7.00
Standard deviation of grades	1.35

2. Comments

- Some students made errors when applying the manometer equation.
- Some students were unsure how to use the specific gravity of mercury in the manometer calculations.
- Most students applied Bernoulli's equation incorrectly between sections 1 and 2. As a result, they failed to establish the correct relationship between the two velocities and obtained incorrect velocity values.
- All students omitted the pressure force term from the momentum equation.
- Some students answered only some of the questions.

- All students completed the retake and performed well with guidance and assistance from the TA.
